

MCT Oil Powders

Medium chain triglycerides (MCT) are a special class of fatty acid with only 6-12 carbon atoms that can be found naturally in coconut or palm kernel oil. Because of its shorter chain length, MCT (C8/C10) is quickly converted in the body and used as a fast and efficient energy source. Great to add into energy and weight management formulations to help increase metabolic rate and suppress appetite.

Benefits:

- Patented microencapsulation technology protects the active ingredient from oxidation for better stability and longer shelf life
- Excellent dispersibility
- Enhances potency of active ingredients for lower total dosing
- Free of undesirable flow aids to meet clean label requirements
- Characterized by neutral taste

Applications:

- Tablets, capsules & gummies
- Powdered drink mixes
- Beverages
- Baked goods & sweets
- Ice cream
- Sports nutrition
